

Pediatric Oncology Patient Support Program

Comprehensive Donor Proposal for Corporate and Institutional Partners

Executive Summary

The Cameroon Oncology Center seeks funding of **20,000,000 FCFA** to implement a **Pediatric Oncology Patient Support Program** aimed at improving treatment access, adherence, and outcomes for children with cancer. Childhood cancer treatment in Cameroon is often interrupted due to financial constraints, transportation challenges, and lack of supportive care. This project will provide **essential financial and social support** to pediatric oncology patients and their families, ensuring continuity of care and improving survival outcomes. The program will directly support vulnerable children receiving treatment at the Cameroon Oncology Center over a 12-month period. The program will be fully implemented by Cameroon Oncology Center. Sponsors and partners can sponsor in part or in full the entire program.

1. Background and Justification

Childhood cancer survival in low-resource settings remains significantly low due to:

- High cost of treatment
- Treatment abandonment
- Limited access to supportive care
- Transportation barriers
- Malnutrition and poor living conditions

At the Cameroon Oncology Center, many families struggle to:

- Pay for chemotherapy drugs
- Afford transportation to the hospital
- Provide adequate nutrition during treatment

As a result, **treatment interruption and abandonment are common**, leading to preventable deaths.

This project addresses these barriers by providing **targeted patient-centered support**.

2. Project Goal

To improve survival and quality of care for pediatric cancer patients by reducing financial and social barriers to treatment.

3. Specific Objectives

1. Reduce treatment abandonment among pediatric oncology patients
2. Improve access to chemotherapy and supportive care
3. Support families with transportation and basic needs
4. Enhance nutritional support during treatment
5. Improve overall patient outcomes and survival rates

4. Project Description

This project will provide **direct support to pediatric oncology patients** in four key areas:

a). Treatment Support

- Subsidies for chemotherapy drugs
- Support for essential laboratory tests
- Emergency treatment assistance

b) Transportation Support

- Travel stipends for patients coming from distant regions
- Support for follow-up visits and treatment cycles

c) Nutritional Support

- Provision of basic food packages
- Nutritional supplements for vulnerable children

d) Psychosocial Support

- Child-friendly care materials (toys, books)
- Counseling support for patients and families
- Improvement of treatment experience

5. Target Beneficiaries

Direct Beneficiaries:

- 50–80 pediatric cancer patients annually

Indirect Beneficiaries:

- Families and caregivers
- Healthcare providers

6. Implementation Plan

Activity	Timeline
Identification of beneficiaries	Month 1
Program rollout	Month 1–12
Monthly patient support distribution	Ongoing
Monitoring and evaluation	Quarterly

7. Budget (15,000,000 FCFA)

Category	Amount (FCFA)
Chemotherapy support	4,500,000
Radiotherapy support	10,500,000
Laboratory & medical support	1,500,000
Transportation assistance	1,500,000
Nutritional support	500,000
Accommodation support	500,000
Program administration	500,000
Contingency	500,000
TOTAL	20,000,000 FCFA

8. Expected Outcomes

- Reduced treatment abandonment rates
- Improved treatment completion
- Increased access to care
- Improved nutritional status of patients
- Enhanced patient and caregiver well-being

9. Monitoring and Evaluation

Key indicators:

- Number of patients supported
- Treatment completion rate
- Number of missed appointments reduced
- Patient satisfaction

Data will be collected monthly and reviewed quarterly.

10. Sustainability

The program will be sustained through:

- Integration into hospital social support services
- Partnerships with NGOs and donors
- Gradual expansion through additional funding

11. Organizational Capacity

The Cameroon Oncology Center has:

- Qualified oncology staff
- Experience in cancer treatment delivery
- Established patient base
- Commitment to pediatric oncology care

12. Conclusion

This project represents a **high-impact, life-saving intervention** that directly addresses the most critical barriers to pediatric cancer care in Cameroon. With a relatively modest investment of twenty **million FCFA**, this program will significantly improve treatment access, reduce abandonment, and save lives.
